change in the unit price

| Itqan Murabahat and Sukuk    |
|------------------------------|
| Fund continues to strongly   |
| outperform its mandated      |
| benchmark during this        |
| period of 2021, achieving an |
| annualized return of 3.01%,  |
| bringing the cumulative      |
| returns since the fund was   |
| established to 31.91% and    |
| the cumulative alpha rate to |
| 15.68% during the same       |
| period.                      |
|                              |

Global fixed income markets faced challenges during the period under review, as the US Federal Reserve increased interest rate in an escalating effort to slow inflation that is running at its highest level in decades. All of which poses a challenge for the fund manager to

maintain the performance of the fund during the upcoming period.

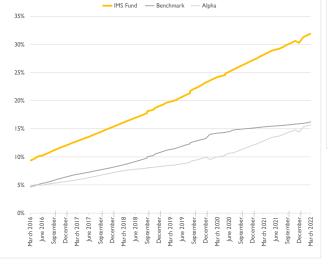

The region's fixed income

markets have been affected by the current economic affairs. In this context, the Fund Manager has been more cautious in the selection of Sukuk and asset allocation in the Fund while continuing to invest in highyield sukuk and Murabaha with prestigious local and Gulf banks to achieve strong performance during the second quarter of the year.
